(These are works I consider to be as significant and of as good quality as various of my peer-reviewed publications. However, the works in this section are often shorter than even brief reports in journals (let alone regular articles), more technical than all but journals almost no psychologists read probably want to review, or for other reasons in my opinion unsuitable for publication in mainstream journals—or just not worth the effort of going through the paper publication cycle for them. Hence, I have elected to begin placing such things on my web page instead of in my file cabinet, or just mailing them to select colleagues.)
